Agrochem Puławy becomes exclusive distributor of Compo Expert products in Poland

Agrochem Puławy, Poland's leading distributor of fertilizers, and Compo Expert, an international manufacturer of foliar and speciality fertilizers, are joining forces to supply their customers with a complete range of fertilizer products. As a result, Agrochem Puławy has become the exclusive distributor of Compo Expert products in Poland starting from January 2023.

Under this arrangement, Agrochem Puławy's product portfolio has been expanded to include granular fertilizers with a nitrification inhibitor, as well as a range of foliar and speciality fertilizers. Its partnership with Compo Expert will allow the Grupa Azoty Group's fertilizer distributor to reach a wider customer base, mainly in the horticultural sector.

Compo Expert, one of the leading producers of speciality fertilizers sold in 100 countries worldwide, was acquired by Grupa Azoty in 2018. It is an international company with sales offices located in 22 countries across Europe, North and South America, as well as Asia and Africa. Products delivered by Compo Expert's four factories in Krefeld (Germany), La Vall d'Uixó (Spain), Deinze (Belgium) and Patras (Greece) include high-quality speciality fertilizers and biostimulants.

"The decision to add Compo Expert products to Agrochem Puławy's offering with an exclusivity option for Poland is a natural step in developing the product portfolio of Poland's leading distributor of fertilizers, which is a member company of the Grupa Azoty Group. The joined sales forces of the two Group companies plus the provision of expert technical advice are a guarantee that we will be able to maintain the consistently high standard of services and products offered to farmers," **says Tomasz Hryniewicz, Vice President of the Management Board of Grupa Azoty S.A. and President of the Management Board of Grupa Azoty Zakłady Azotowe Puławy S.A.**

COMPO EXPERT offers safe solutions for vegetable, fruit, ornamental plant, field and nursery cultivation, and for sports turf, recreational areas and public greenery maintenance. The company's product mix includes speciality mineral and stabilised fertilizers, slow-release and controlled-release fertilizers, water-soluble and liquid fertilizers, as well as biostimulants and soil conditioner products.
