Grupa Azoty wins “National Champion” title

Grupa Azoty has been included in the “National Champions” ranking prepared by the editors of Polityka Insight. The ranking comprises 15 largest Polish companies which stood out with the best results in four key categories: economy, industry, foreign operations and innovation.

In 2021, the company won the National Champion title, taking the ninth position in the ranking. In the 2020 ranking, Grupa Azoty was among the companies referred to as Aspiring National Champions.

In addition to macroeconomic indicators or the performance and role of individual companies in the industry, the authors of the report considered matters related to circular economy and climate neutrality, noting that the success of climate transition depends very much on the attitudes of the business community.

“Grupa Azoty’s presence in the National Champions ranking is a confirmation of its strong position in the areas of economy and innovation. The Group has the potential to improve its results year by year, as demonstrated by the marked improvement of its position in relation to last year’s ranking. I believe that the implementation of Grupa Azoty’s new strategy for 2021-2030, in which we focus on sustainable development and climate and energy transition, will help us achieve these ambitious goals,” **says Tomasz Hinc, President of Grupa Azoty S.A. Management Board.**
